

# Working Together

so we all go home safe and well!

Everyone has a right to the information and equipment they need to be safe at work.

1

Good health and safety systems include employee participation and training.

2

Reporting hazards and accidents is everyone's responsibility.

3

If you're concerned about a safety issue, make your concern clear so it can be fixed before problems occur.

4

Everyone is responsible for keeping themselves and others safe.

5

We aim for a safe and healthy workplace.

6

If you want to talk about health and safety contact your health and safety representative or your manager or supervisor:
